

Main goal: To increase subscription base

Ingest data into Databricks
↓
Check available datasets
↓
Identify tables and columns
↓
Verify UserID relationship
↓
Determine whether data is sufficient

User and Viewership dashboards

Step 0: Reading and Understanding Business Requirement

Step 1: Asking Data Driven Questions

Step 2: Data Inspection

Step 3: Data Processing

Step 4: EDA & Data Analysis

Step 5: Visualizations

Step 6: Business Recommendations

Users

Viewership

- Are the customers contactable?
- Can marketing campaigns be personalized?
- Which province are most subscribers coming from?
- What age group has the highest number of subscribers?
- What race are the subscribers?
- What gender are the subscribers?
- What content is watched by each gender?
- Are customers active online?

- What is the average watch time?
- Which content has the highest views?
- When are subscribers watching content?
- What time of day do subscribers watch the most?
- Which content has the highest watch time?
- Which content has the highest completion rate?
